PROFESSIONAL SUMMARY

Senior Full-Stack & DevOps Engineer with 6+ years building and operating business-critical systems: GRC/compliance, ERP, core banking, healthcare, multi-tenant SaaS and multi-vendor e-commerce. Delivers across ASP.NET Core, Laravel, Node.js and React / Next.js, and owns releases end to end with Docker, CI/CD, Terraform, AWS and Azure. Has built 15+ CI/CD pipelines and shipped 30+ production platforms for clients in Saudi Arabia, the USA, Germany, France, the UAE and Japan, and maintains open-source Laravel / Filament packages.

TECHNICAL SKILLS

Languages: C#, PHP, TypeScript, JavaScript, SQL, Bash

Backend: ASP.NET Core, Entity Framework Core, Dapper, Laravel, Filament, Livewire, Node.js, Express, Strapi, REST, GraphQL, JSON:API, WebSockets, queues (BullMQ, Laravel Horizon)

Frontend: React, Next.js (SSR / SSG / ISR), Tailwind CSS, Redux Toolkit, TanStack Query, Angular, i18n and RTL (Arabic / English)

Databases: SQL Server, Oracle, PostgreSQL, MySQL, MongoDB, Redis, Meilisearch

Cloud and DevOps: AWS (ECS Fargate, EC2, RDS, ECR, ALB, S3, Secrets Manager, IAM / OIDC), Azure (VMs, Blob Storage, networking), Terraform, Docker, CI/CD (Bitbucket Pipelines, GitLab CI/CD, GitHub Actions), Nginx, Traefik, Linux hardening, zero-downtime deploys with automatic rollback

Architecture and Security: system design, modular monolith, event-driven design, multi-tenancy, RBAC and claims-based authorisation, OAuth / JWT, OWASP, penetration-test remediation

Testing and Integrations: Pest, PHPUnit, Jest, Vitest, PHPStan, OpenAPI; Stripe, Fatura, webhooks, Firebase Cloud Messaging, Claude API

WORK EXPERIENCE

Senior Full-Stack & DevOps Engineer | T-NEX GmbH | Germany (Remote)

Apr 2026 - Present

German software company building compliance (GRC), AI-powered business tools and SaaS products; team of 40.

- Built and maintain 15+ CI/CD pipelines (Bitbucket Pipelines) with immutable images and health-checked automatic rollback; optimised existing pipelines, cutting build time by 53% (3 min to 1.4 min).
- Provisioned AWS for new projects with Terraform (ECS Fargate, RDS SQL Server, ALB, ECR, Secrets Manager, keyless OIDC deploys), including a dedicated client tenant in the AWS Singapore region.
- Set up new servers and migrated projects onto them across testing, staging and production; set up Azure Virtual Desktop (AVD) environments for the development team.
- Designed a config-driven UI engine (React + ASP.NET Core) that renders nested business processes from JSON, cutting new-form development time by ~70%.
- Built an RBAC system for three governance lines with claims-based authorisation, and a workflow and approval module for the asset lifecycle (programs, contracts, BIA, RIA).
- Engineered risk and compliance reporting with an OLAP-style data cube, and REST APIs and import / export pipelines over Oracle and SQL Server (Dapper / EF Core).
- Led security hardening (input validation, encryption at rest and in transit) and coordinated regular penetration testing.

Stack: C#, ASP.NET Core, EF Core, Dapper, React, Next.js, SQL Server, Oracle, Docker, AWS, Azure, Terraform, Bitbucket Pipelines

Full-Stack Developer | Azureo | Paris, France (Remote)

Jun 2025 - Apr 2026

Global telecom-outsourcing and technical services company; engineering team of 10.

- Developed and maintained the internal platform that 8 teams (80 employees) use to communicate, run HR processes and generate invoices.
- Shipped new features end to end and resolved production issues reported by the business teams.
- Designed and built a real-time notification system (WebSockets) used across all internal tools.
- Led the modernisation of the tool suite (framework and dependency upgrades, refactoring), containerised it with Docker and replaced manual releases with CI/CD.

Stack: PHP, Laravel, React, MySQL, WebSockets, Docker, CI/CD, Azure, AWS

Full-Stack Developer | Reterra | Remote

Jan 2025 - Jun 2025

Prop-tech company building real-estate management solutions; team of 10.

- Developed the core platform: real-estate workflow management, project management and a built-in mini CMS; also built the company's main website.
- Managed the testing, staging and production servers on AWS (EC2, RDS, S3) with Docker and Nginx, and owned deployments and CI/CD.

Freelance Senior Full-Stack & DevOps Engineer | Self-employed | Remote

Feb 2021 - Present

Part-time delivery alongside full-time roles for clients in Saudi Arabia, the USA and Syria; full ownership from development to servers and CI/CD.

- **E-commerce group (Saudi Arabia):** build and run 12 online stores for one client on the Laravel-based Aimeos framework; re-platformed them to headless with one multi-site backend (JSON:API / GraphQL) and one multilingual Next.js storefront, released to 16 targets by a GitLab CI/CD fan-out pipeline, with Fatura payments and stock-syncing webhooks.
- **15 client websites**, including Strapi + Next.js sites for the Hermosa medical group and other US clinics, and Roqa: cut CSS payload by 57% (906 KB to 389 KB), added ISR caching, technical SEO and security headers, and patched CVE-2025-66478 across all sites within days.
- **DevOps:** Dockerised every client stack across testing, staging and production, with GitLab CI/CD that backs up before each release and rolls back automatically; administer the Linux VPS fleet (Nginx, PM2, SSL).
- **Asraa (Saudi Arabia):** bilingual Laravel + Filament project-management platform with Kanban, workflow stages, a dynamic form builder, analytics dashboards and HR modules.
- **Medboss:** medical lectures and exam-prep platform: Laravel REST API (~100 endpoints), React + TypeScript student app and React admin dashboard.

Stack: PHP, Laravel, Filament, Aimeos, Strapi, Next.js, React, TypeScript, MySQL, Docker, GitLab CI/CD, Nginx, Linux

Full-Stack Developer | Prokoders | UAE (Remote)

Apr 2023 - Oct 2023

Software company delivering custom web solutions; team of 20.

- Developed features for a full airport management system for a major airport in Qatar.
- Built the company's main website and the core of its custom CMS, reused as the foundation for client websites.
- Managed the testing, staging and production servers, deployments and CI/CD for client projects.

Full-Stack Developer | RemoColla (SMA Group) | Tokyo, Japan (Remote)

Aug 2021 - Nov 2022

Japanese ICT consulting and software company; team of 40.

- Built 35 ERP modules for Japanese clients (user management, attendance management and more) and a central platform for managing multiple ERP instances.
- Developed a car e-commerce platform and JavaScript browser extensions for image processing, plus REST APIs (Yii2, JWT) for a pharmaceutical manufacturer.
- Managed the testing, staging and production servers, deployments and CI/CD for the team.

Stack: PHP, Yii2, Laravel, Angular, TypeScript, JavaScript, MySQL, CI/CD

Backend Developer | Automata4 | Aleppo, Syria

Aug 2020 - Feb 2021

Custom IT solutions company; team of 15.

- Developed backend features and fixed production issues across a core banking system and ERP systems for hospitals and universities.

OPEN SOURCE AND PRODUCTS

- **Filament Sitemap Generator** and **Filament Scout Manager:** Laravel / Filament plugins listed on filamentphp.com, with Pest tests, PHPStan and GitHub Actions CI. Also **Filament Multitenant Plugin** and **Laravel Route Tracker**.
github.com/Muhammad-Nawlo
- **AutoDeploy (own product):** AI deployment platform (Next.js, BullMQ, PostgreSQL, Docker, Traefik, Azure) that detects an app's stack, generates hardened Dockerfiles and serves it on HTTPS; uses the Claude API to diagnose failed builds.
- **Multi-tenant SaaS e-commerce (own product):** Laravel 12 + Filament modular monolith with a database per tenant, Stripe subscription billing and an event-driven financial ledger.

EDUCATION

Bachelor of Informatics Engineering (Software Engineering) | University of Aleppo, Syria | 2019 - 2024 | Grade: 79.8%

TRAINING

MCSA Windows Server Administration (New Horizons) | CCNA networking coursework (Cisco) | Google IT Support

VOLUNTEERING

IT Coach | University of Aleppo | Oct 2023 - Present: teach students networking, cybersecurity awareness and web development.
