muhammad-nawlo.github.io/my-portfolio | github.com/Muhammad-Nawlo

Syrian · Arabic (native), English (C1)

Senior Full-Stack Engineer with building and running business-critical systems end to end:
· Delivers across the full stack –
– and owns what happens after the merge: Docker, CI/CD pipelines,
and Linux production servers. Experienced working remotely with teams in Germany, France, UAE and Japan,
and with a Saudi-based e-commerce client. Native Arabic speaker, fluent in English – able to work directly with both
business stakeholders and engineering teams.

Backend	C# / ASP.NET Core (.NET), Entity Framework, Dapper, PHP / Laravel (Filament, Livewire, Scout), Yii2, Node.js / Express, REST API design, RBAC & claims-based auth, multi-tenancy
Frontend	React, Next.js (SSR), JavaScript / TypeScript, Angular, Alpine.js, Tailwind CSS, Bootstrap, SASS, config/JSON-driven UIs
Data	SQL Server, Oracle, MySQL, MongoDB, query optimisation for hierarchical data models, reporting & OLAP-style data cubes
Cloud & DevOps	AWS (ECS Fargate, RDS, ECR, ALB, Secrets Manager, IAM/OIDC), Terraform, Docker, Bitbucket Pipelines, Jenkins, CI/CD, Nginx, Linux (Ubuntu) VPS administration
Practices	System design, secure coding (input validation, encryption at rest/in transit, pen-test remediation), workflow & approval engines, SEO, Git

– T-NEX GmbH · Germany (Remote) Apr 2026 – Present
German software company building compliance (GRC), AI-powered business tools and SaaS products.

- Designed a (React + ASP.NET Core) that renders nested business processes from JSON,
- Built a scalable for three governance lines (asset managers, second line, third line) with dynamic role-to-resource mapping and claims-based authorization.
- Developed a for the asset lifecycle (programs, contracts, BIA, RIA) with automated e-mail alerts for due dates and status changes.
- Engineered a – risk matrices, protection-needs and outsourcing reports – plus an OLAP-style data cube for self-service analysis.
- Built REST APIs and configurable over Oracle and SQL Server (Dapper/EF) for integrations, batch processing and system migration; optimised queries on hierarchical GRC data.
- Led security hardening – input validation, encryption at rest and in transit – and coordinated regular
- Own production operations for the company's platforms: Dockerised services behind Nginx, with immutable image tags and health-checked automatic rollback, and a manual, gated production release pipeline.
- Provisioned and operate (ECS Fargate, RDS SQL Server, ALB, ECR, Secrets Manager, keyless OIDC deploys); rolled out a dedicated client tenant and relocated it to the .
C#, ASP.NET Core, EF Core, Dapper, React, Next.js, SQL Server, Oracle, Docker, AWS, Terraform, Bitbucket Pipelines, Nginx

– Azureo · Paris, France (Remote) Jun 2025 – Apr 2026
Global telecom-outsourcing and technical services company (15+ years in telecommunications).

- Designed and built a used across the company's internal tools.
- Led the – framework/dependency upgrades, refactoring and bug fixing.
- Acted as the go-to engineer for internal teams, triaging and resolving their reported issues and feature requests.

– **Reterra** · Remote

Jan 2025 – Jun 2025

Prop-tech company building real-estate management solutions.

- Developed features for the core modules, plus companion mini-CMS and mini-ERP
- Set up and managed server environments.

– **Self-employed** · Remote

Jan 2024 – Present

- built and customised a group of multi-vendor on the Laravel-based Aimeos framework (Al-Hasnaa, Oriental Steps, Mtgry).
- developed and maintain CMS websites for the (7+ sites across allergy, endocrinology, autism-care and cosmetic clinics).
- built an exam-preparation platform for medical students preparing for the national licensing exam.
- Published two open-source listed on filamentphp.com – see Open Source below.

– **Prokoders** · UAE (Remote)

Apr 2023 – Oct 2023

- Built the , used as the foundation for client websites.
- Improved technical across client websites and resolved defects in existing projects.
- Managed staging servers and deployments.

– **RemoColla (SMA Group)** · Tokyo, Japan (Remote)

Aug 2021 – Nov 2022

Japanese ICT consulting and software company.

- Developed and built a central platform for managing multiple ERP instances.
- Built to support client workflows.
- Managed the staging server and Git workflow for the development team.

– **Automata4** · Aleppo, Syria

Aug 2020 – Feb 2021

- Developed new services and features for a , working within the security and reliability constraints of the financial sector.

-
- – Laravel/Filament plugin generating XML sitemaps with splitting, news, image and alternate-language entries, and search-engine ping. filamentphp.com · [GitHub](#)
 - – Filament plugin to manage Laravel Scout search indexes from the admin panel. filamentphp.com · [GitHub](#)
 - – microservice-based system (separate backend and dashboard) for managing a multi-service residential compound. [GitHub](#)

Engineering
University of Aleppo, Syria · 2019 – 2024 · Grade: 79.8%

– Software

CCNA (Cisco networking) coursework
MCSA Server Administration – New Horizons
Google IT Support

– University of Aleppo · Oct 2023 – Present

Teach students computer and networking fundamentals, cybersecurity awareness, and web development with PHP, Python and JavaScript, including CMS platforms and modern frameworks.
